

FELIPE MONTEALEGRE MORA

Physics | Data Science | AI

San José, Costa Rica

(+506) 8758-6342 | felipe.montealegremora@gmail.com | <https://www.linkedin.com/in/felimomo/>

PROFESSIONAL SUMMARY

Interdisciplinary researcher experienced on data-driven and AI-enhanced approaches within science, with 10+ years experience in research & software development at R1 institutions. Proven track record of delivering production-ready deep learning and data workflows in research contexts. Recognized for strong analytical thinking and communication skills enabling teams to deliver high-impact data products.

PROFESSIONAL EXPERIENCE

UNIVERSIDAD DE COSTA RICA, San Pedro, Costa Rica. Higher Education.

Professor of computational physics August 2025 - Present

- Mentored advanced students on AI/ML applications to physics research.
- Developed a data-driven curriculum for graduate program in coastal management.

UNIVERSITY OF CALIFORNIA AT BERKELEY, California, USA. Higher Education.

Postdoctoral researcher at Schmidt Center for Data Science & the Environment.

September 2024 - July 2025

- Developed data-driven products with stake-holders to deliver accurate wildlife estimates.
- Generated high-impact papers on AI-first approaches within ecology and fishery science.

Postdoctoral researcher at the Boettiger Lab.

September 2022 - August 2024

- Built reinforcement learning tools for adaptive ecosystem management.
- Mentored students on data science, deep learning and data policy projects.

EDUCATION

UNIVERSITY OF COLOGNE, Cologne, Germany. *PhD in quantum computing (magna cum laude)* Jan. 2018 - Mar. 2022, *MSc. in theoretical physics* Oct. 2015 - Dec. 2017.

UNIVERSITY OF COSTA RICA, San José, Costa Rica. *BSc. in physics* Mar. 2010 - Jun. 2015.

LANGUAGES

Spanish (native); **English** (bilingual); **German** (Intermediate)

SKILLS

Python, R, SQL, C++, Fortran | GitHub, GitLab | CI/CD | Statistical Modelling | Algorithm Development | Stakeholder Management | Data Visualization | MLOps | Deep Learning

ADDITIONAL INFORMATION

Author of 14+ articles in prestigious academic journals on deep learning, data science and quantum computing. Presented original work at several international conferences. Research mentor for 10+ students, mentor & judge at first Costa Rican quantum hackathon.
